

I am a truck driver and have the XM radio. I find it very useful to get traffic and weather on the big cities that i must travel in. It is much better than regular radio because i have to wait a long time to hear the traffic and if i miss something then i have to wait again for a long time to hear it again. On XM i hear it over and over and it helps me along missing the bad traffic. I pay for XM and should have the right to hear what I want when I want. Thank you very much.... Jerry Cregar
